House rules

Visiting engineers and artists should take heed of the following general house rules.

Concerning technical and hospitality riders: the production- and technical staff of De Peppel considers the on time delivery of technical and hospitality riders (at least two weeks prior to the show) the responsibility of the artist or his/her management. In the case that the above mentioned is not done in time, the in-house crew of De Peppel will be at liberty to proceed with their own made preparations. On site deliberation is always possible, but this cannot be one-sided and is dependent on the situation.

Use of in-ear equipment must be reported at least 6 weeks in advance due to scheduling of our crew.

Concerning mixing consoles that tour along with a band: because of limited space for light-, front of house- and monitor consoles, **only one desk can be places at either position**. Therefore, if a band chooses to bring their own light-, front of house- and/or monitor consoles, all bands are allowed to use this desk. The swapping of consoles during a production is not an option unless agreed well in advance with the in-house crew of De Peppel.

The maximum of decibels produced by the P.A. system is 103 dB A weighted. LAeq 15

Should the visiting engineer exceed this maximum level at a regular pace, a warning will be issued by the in-house staff. In case of a second warning, the in-house staff is at liberty to take over the front of house console and continue the show.

IMPORTANT:

The use of pyro, confetti CO₂- and foam cannons, as well as the use of snow machines is prohibited at all times. If used, the damage and cleaning costs are for the artist/booking agency.

All décor pieces, advertising material and decoration within our buildings must be fire retardant impregnated! In case of doubt, we reserve the right to test the fire retardancy.

More information can be found on www.brandwerendimpregneren.nl

De Peppel is located on a street where there is paid parking, behind a cycle path.

Loading and unloading can be done on the sidewalk in front of the building by two cars or a small delivery van.

There is no place for a large truck or a Nightliner. There is free parking within a short walking distance, you can ask the technicians of the evening about this.

For any further questions, please contact:
